# WMK PLATINUM EDITION

All products of the WMK Platinum Edition are made of satin finished SS 10/18. Depending on the version, we have chosen a wall thickness of 0.6 mm to 1.2 mm to meet the highest professional requirements. All products in this series have a fully induction-welded aluminum sandwich bottom. This consists of an aluminum layer and a final bottom plate made of SS 0/18, which was pressed after welding under 2500t.

This procedure of production guarantees optimal heat distribution on the bottom of the pot. This heats up the cookware of WMK Platinum Edition very evenly and quickly. Therefore a detachment of the bottom is impossible.

All handles are welded with up to ten points and do not take on the heat of the pot body.

The used materials guarantee longevity, acid resistance and easy cleaning.

Of course, a use on all types of stoves, including induction, is possible.

## PROGRESS AND DEVELOPMENT

- 1 Non-stick surface finish. Non-stick coating layer, Made from our unique lotan® sealing with antibacterial effect.
- 2 Reinforced layer. Reinforced layer, fortified With mineral particles to provide a long lasting Abrasion resistance.
- 3 Anti-corrosion layer. Anti-corrosion layer for Optimal protection against aggressive detergents, Fruit acids and acetic.
- 4 Titanium oxide layer. Titanium oxide layer nearly As hard as diamond, burned on at 20.000 °C, Extremely scratch and cut resistant.
- 5 Heavy duty handcasted aluminum. Abrasive Blasting enhances the surface area 12 times better, enabling superior adhesion for the subsequent Layers.

Lotan® is the new revolutionary coating technology for modern gastronomic applications.

The non-stick characteristics of our Lotan® coating simplify the cleaning of your cookware and keep the surface germ free.

Our Lotan® coating makes our cookware so easy to rinse that it helps reduce your water consumption, which therefore helps save one of our planets most precious natural resources – water and your hard earned money.

## HACCP Cutting boards

All WMK cutting boards are made of extremely hard polyethylene HDPE plastic, which minimizes wear off, such as cuts. Accordingly, these cutting boards must be less planed and are more durable. Cleaning in dishwashers is no problem. All cutting boards can be used on both sides.

One side has a juice groove, while the second side is completely smooth.

Color coding according to HACCP.

**WMK Chafing dishes**

The WMK Chafing Dishes of the Black & Platinum Edition have been specially developed for use on induction buffets. The use of high-quality stainless steel 10/18 and aluminum in the high-precision manufacturing allows a hundred percent plan, encapsulated sandwich bottom, which can absorb the induction optimally.

All models are supplied with a base so that they can be operated without induction. The frames are stackable and thus practically stowable.

The hydraulic lid hinges are virtually wear-free and allow particularly gentle closing of the lid. Of course, all models are designed in such a way that the condensate water stays within the chafing dish at all times without dripping onto the buffet.

# HYGIENE

## How to find the right rack:

1) Measure the height of the glass using the left scale of this page. Due to the height you can easily calculate how many extenders are needed to fully cover your specific glass. Please divide the height by 40 mm. Reduce the result by 1 (the basic dishwasher rack) and than you know, who many extenders you need.

2) Put the glass with the highest diameter on the measurement circles. The circle will tell you how many compartments are needed.

13 x 11 cm

12 x 12,5 cm

9 x 8,5 cm

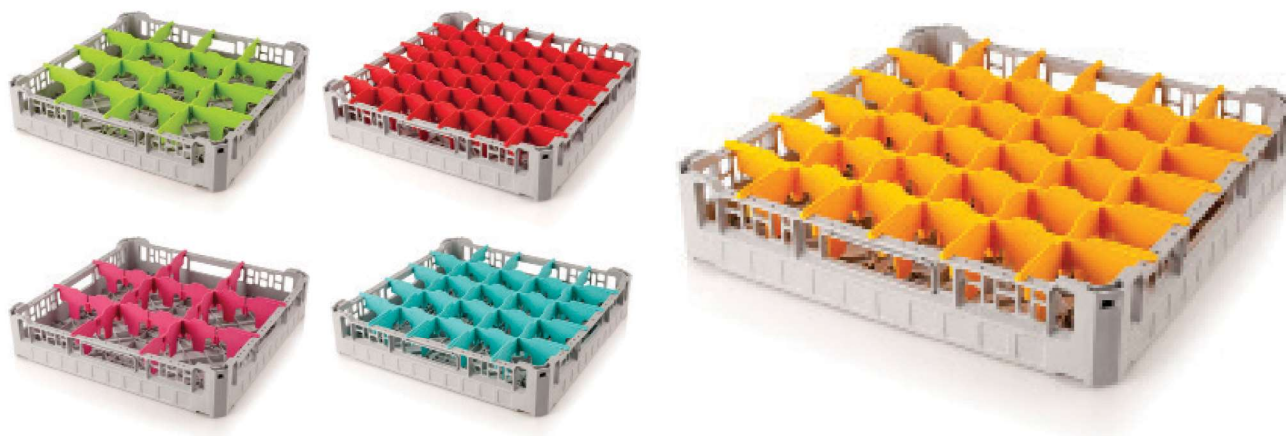

9 x 11 cm
